

# Academy Ave. Reconstruction Project - Phase II in Progress

## FULL CLOSURE of Academy Ave. from Almond Ave. to 11<sup>th</sup> Street

Phase II includes the realignment and full reconstruction of the roadway from about 150 feet south of 11<sup>th</sup> Street to the area about 350 feet south of Annadale Ave. The project also includes modifications to the existing traffic signal at Annadale Ave. This phase will require the **full closure of Academy Ave. from Almond Ave. to 11<sup>th</sup> Street**. A temporary detour will be in place for through traffic to 11<sup>th</sup> Street, O Street and North Ave. During the detour, the side streets in this area (11<sup>th</sup> Street, 12<sup>th</sup> Street and Annadale Ave.) will remain open for access to businesses and residences. Truck traffic will be routed to Jensen Avenue, Bethel Ave. and Central Ave. around the work zone. It is anticipated that the detour will be in place through the end of 2019 and the project will be completed in early 2020. Thank you in advance for your consideration and understanding as the City looks to complete this important project for the community. For more information please contact City Engineer Josh Rogers at (559) 876-6300, Ext.1560, or by email at [jrogers@yhmail.com](mailto:jrogers@yhmail.com).
